agrē Lite

Your company relies heavily on its financial management and accounting solutions to manage and grow your business. But as your business grows, off-the-shelf software solutions can limit your ability to effectively manage your business and its day to day operations.

Where can you find the tools your business needs to manage the unique challenges your company faces?

agrē Lite

agrē Lite contains everything you need to manage your company’s business — accounting, prepayments, customer relations management (CRM), inventory management, sales reporting, project accounting, forecasting, and budgeting. With flexible deployment options and integrated value-add capabilities, **agrē Lite** can easily be tailored to fit the requirements of your unique business challenges.

Tronia Systems has been providing advanced technology solutions to hundreds of businesses across North America since 1986. Built on the latest technologies, **agrē Lite** is the most powerful, easy to use suite of software and services to manage your business. Capitalizing on security by Citrix coupled with our Hosted service, you will be able to safely access your critical business information from anywhere you have Internet access on almost any device that runs a browser.

Why agrē Lite?

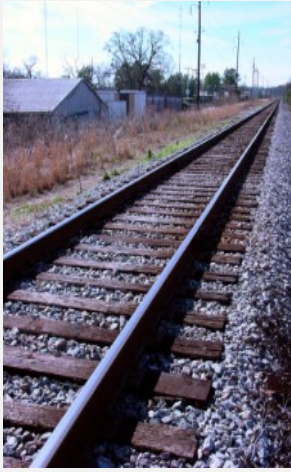

- Full Featured Accounting Capabilities
- Powerful Prepayment Options
- Flexible Inventory Management
- Extensive Sales Reporting
- Project Accounting, Forecasting, and Budgeting
- Fully Integrated with **Grower Central**

"Some things that stand out are the willingness by the Tronia staff to reconfigure the program to suit the customer's needs and to do it in a timely manner. Tronia's ongoing support by their knowledgeable staff is invaluable. The program's ability that allows data to be viewed by drilling down to deeper levels saves a lot of time. Every time I turn around it seems that Tronia has improved the program.

I am very happy with the new agrē program, its new features and the Tronia Staff."

Gary - SK

agrē Lite Capabilities

agrē Lite Overview

Including Accounts Receivable, Inventory, Accounts Payable, General Ledger and Customer Relationship Management, **agrē Lite** is a powerful financial management solution for your business.

- supports multiple locations, regions and divisions
- full retail locations, warehouses, & sprayers/mobile warehouses
- scalable solution: add software modules or new locations, regions and divisions as you grow
- unlimited number of users
- comprehensive online help
- personalized role-based security
- customizable report layouts for work orders, loadout tickets, invoices and statements
- complete audit trails and transaction history
- user-maintainable configuration items

Accounts Receivable

agrē Lite's full-featured AR module seamlessly handles orders, loadouts/bill of ladings, invoicing and statements.

- enhanced pricing capabilities (e.g. group discounts & time sensitive pricing)
- quotes and work orders
- enhanced prepayment plans and prepayment dollar tracking
- bill and hold (delayed delivery)
- unlimited payment types
- enhanced cash out reporting
- Customer Relationship Management (CRM)
- credit limits & credit management
- permit, farm, & field information
- release numbers
- low margin tracking
- EMR reporting (including AgCollect)

Inventory Management

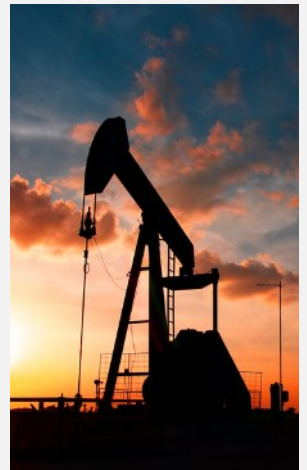

Managing inventory is a critical part of any business. **agrē Lite** gives you the tools you need to ensure you stay on top of your inventory at all times to maximize the efficiency of your business.

- balanced sub-ledger (for easier Inventory Reconciliation)
- location-based costing and pricing
- price history
- optional designated Prepaid Price Level
- inventory position reporting
- supply management with automatic low-inventory messaging
- Lot Number tracking
- taxes management process
- product program functionality
- supplier mapping capability
- editable product codes
- associated products
- expanded dangerous goods information & reporting

Accounts Payable

Keeping a tight rein on costs is habit of any successful business. Track your costs from ordering through payments with **agrē Lite**, and optionally add operational expenses (such as shipping) directly to the cost of the product. AP contains complete reporting of purchase orders, suggested payments, and supplier purchases

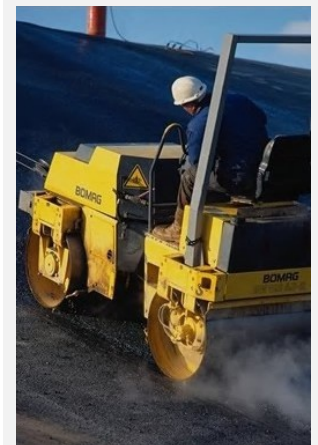

- purchase order approval process
- ag-retail specific functionality (e.g. release numbers and inventory position) with full reporting
- supplier contract management
- supplier prebuys
- unlimited payment types
- flexible tax capabilities
- separation of inventory costs from operational expenditures
- ability to set up post-dated payments
- cheque batch approval process
- outstanding cheque report as per bank accounts
- EFT batch payments

“This latest upgrade really has me excited. My favorite is the summary statement for the customer. I have printed it for several customers and they are equally excited.

When I was preparing for our June month-end statements, I made a sales report showing only the returns. Then I used that list and checked the Summary Statements to make sure the returns were priced correctly. This report saved me a lot of time. Nice!”

Clarise – AB

Access to timely and accurate information is paramount in making the right decisions - especially in a multi-location business. Tracking orders, orders to sales, prepaid sales and managing inventory has become nearly effortless between the locations and as it is increasingly important for proper product positioning - especially with the more common than not - "condensed" seasons. Reports that used to take hours to days to generate are now available in seconds in a matter of a few clicks!!

The credit module from a finance perspective is very functional - being able to watch all customers and set specific warnings and "stops" for receiving more product.

Finally, the hosted solution is so flexible with accessibility from virtually anywhere - as well as providing the safety of remote data backup - simply provides peace of mind."

Parker, SK.

General Ledger & Financials

The ability to effectively plan for your business is a key component of your success. **agrē Lite** gives you very flexible options for tracking revenues and expenses based on projects and for setting up and tracking budgets within your organization. With a better understanding of your actual revenues and costs, you can make better informed decisions to grow your Agribusiness.

- bank deposits
- bank & credit card account reconciliation
- multi-currency
- fixed asset management and depreciation calculation
- recurring & reversing journal entries
- subledger balancing
- diverse financial reporting with comparative analysis
- location-based income statements
- ability to close and reopen periods & years
- project accounting functionality
- budgeting & forecasting

Reports & Exports

agrē Lite gives you powerful reporting and analysis tools to better use your business data to manage your business. The ability to generate Sales Reports at the push of a button makes it easier for you to provide sales transactional data to your partners for their sales programs.

- ability to send all reports to PDF, raw text, or email
- data exports to text/CSV or Microsoft® Excel
- AgCollect export and automatic email submissions
- TKXS, FMC and other partner formatted exports
