

## agrē Agronomy Module

Advanced Technology for Ag-Retailers

### More Solutions by Tronia Systems

- **Hosted Solution** - access your data anywhere, anytime
- **Integrated Blend Control** - communicate directly with integrated blend controllers
- **Grower Central** - provide flexible, secure data access to your producers
- **Customer Relationship Management**

# agrē Agronomy

**agrē Agronomy** merges science with technology. Capitalizing on sales information already entered as part of your day-to-day accounting process, on a per field basis you can plan what to grow; make recommendations; record soil test and scouting results; allocate purchased crop inputs and services; and provide your growers with complete reporting which is integrated with Grower Central!

**agrē Agronomy** handles these tasks with ease and integrates seamlessly with the agrē Solution:

- **Field Manager**
  - define customer fields, store legal land & GPS coordinates, acres & documents
  - link field locations to Google® **Maps**, outline field boundaries, import ShapeFiles, add markers, color coordinate fields-by crop - consolidate fields and print 'one big map'
- **Soil Tests**
  - download & import soil sample test results from all partner labs
  - submit tests with Midwest and A&L and retrieve recommendations
  - trend analysis reporting
- **Crop Plans**
  - crop input planning, recommendations, fertilizer targets & actuals, yield targets & tracking
  - farm budgeting (target & actual income, crop input costs & expense tracking)
  - import Crop Plans products directly into Work Orders
- **Field Scouts \*\* Mobile App**
  - user-defined lists of weeds, insects, & diseases
  - image gallery for photos, attach other documents
  - import Field Scout products directly into Load out Tickets
  - Offline capabilities for infield work
- **Custom Application \*\* Mobile App**
  - schedule custom applications, operators, & equipment
  - track status & allocate products applied
  - import products directly onto Loadout Tickets
- **Product & Expense Distribution**
  - allocate purchased crop inputs, services and expenses to a specific customer field
  - track other farm or overhead expenses
- **Field History Reporting**
  - complete history of plans, scouts, custom apps, tests, inputs & services
  - easily access all activities and print detailed reports
- **agrēMobile**
  - mobile-friendly web app works with almost any browser (Windows, Android, iOS)
  - live link to your agrē database or work off-line & sync when reconnected
- **Document Manager**
  - store photos, detailed maps, contracts, emails, & other documents
- **Integration with Grower Central**
  - allow your growers to view their agronomy information online anytime
