agrē *iBlend w/ Inventory*

The agrē *iBlend Solution* is much more than just a blend calculator; it's a comprehensive, flexible, easy to use, fertilizer blending system. Combine that with our **Inventory** system and you have a powerhouse tool to manage your fertilizer business.

Features of the agrē *iBlend Solution*

- Calculate Dry or Liquid Blends
- Use Scaled or Volumetric Blenders
- Multiple Blend Calculations and Types
- Detailed Customer Blend History
- Blend Quotation System
- Split nutrient sources
- Unlimited Micro-nutrients
- Manage Customers, create Load Out Tickets & Work Orders
- Include other products or services in blends (chemicals, seed, spreading charges, etc.)

Features of agrē *Inventory*

- Manage Products (including estimated costs; product types, units, characteristics, manufacturers, nutrient makeup, densities, etc.)
- Enter Inventory Receipts
- Manual Counts & Inventory Adjustment Tools
- Bin Management
- Manufacturing
- Manage Suppliers
- Enter Purchase Orders
- Integrates with one of our Partner Blend Control Systems (Layco, Kalher, LV, Rancan)
- Save, print, PDF, or email Price Sheets, Batch Sheets, LOT, WO, & PO

iBlend is a subset of the complete agrē Solution, so should you choose to upgrade in the future all the work you do in *iBlend* carries over seamlessly to the full version.
